SUMMARY

Software engineer with production experience across full-stack web, mobile, and Smart TV platforms. Shipped real-time systems reaching 99.9% session reliability (Amazon Chime SDK, LiveKit, Firebase), payment and KYC flows that cut settlement cycles from 7 days to 3, and a live Samsung Tizen TV application. Background also spans IoT research and network security. Comfortable working across the stack, from API design to deployed UI.

EXPERIENCE

Junior Full Stack Developer

AscentSpark Pvt. Ltd.

Remote

Nov 2025 – Present

Tutopia Web App — Education Learning Platform (1M+ downloads)

Jan 2026 – Present

- Built the end-to-end subscription purchase flow and finance KYC verification for tutor payouts and wallet operations (Next.js, Laravel APIs).
- Built Quick Live 1:1 tutoring sessions powered by wallet transactions, with a real-time booking and joining flow.
- Integrated Amazon Chime SDK for large-scale live classroom sessions, achieving 99.9% session reliability with raise-hand and moderation features.
- Built raise-hand and screen-share request features using Firebase Realtime Database for instant status sync between students and teachers.
- Improved application performance ~30% and cut redundant API calls ~35% by introducing TanStack Query caching.

AI Spoken Learning — Real-time AI Agent for Spoken English Practice

Jan 2026 – Feb 2026

- Integrated LiveKit SDK as the real-time communication layer for an AI spoken-English coaching agent, cutting join time ~40% versus the previous Chime-based approach.
- Built the frontend for real-time AI evaluation of spoken English, including live audio-level indicators, transcription display, and instant feedback/scoring.
- Implemented full session lifecycle management: room creation, participant join, AI agent connection, and graceful teardown.

SSEN Samsung TV — OTT Platform for Sports & Football

Nov 2025 – Dec 2025

- Built a React-based OTT application for Samsung Tizen Smart TVs, implementing Norigin Spatial Navigation for D-pad/remote-control focus navigation.
- Integrated live video streaming pipelines for real-time football matches and sports events, and backend API endpoints for match data and league standings.
- Designed TV-optimized, remote-friendly UI layouts with focus management and smooth scroll handling for large-screen displays.

Software Developer Intern

Innovilla Pvt. Ltd.

Varanasi, India (Onsite)

Jun 2025 – Oct 2025

Sellio.in — Local-First E-Commerce Platform for Indian Sellers

Aug 2025 – Oct 2025

- Built full-stack features for Sellio (Next.js frontend, Laravel REST APIs), a zero-commission platform for local Indian sellers.
- Integrated Razorpay for payment processing and reworked seller payout timing, cutting the settlement cycle from 7 days to 3–4 days.
- Integrated the Delhivery API for warehouse creation, shipment tracking, pickup/drop scheduling, and delivery charge calculation.
- Built a QR-code-based seller registration flow and the complete order-to-delivery pipeline, from checkout through pickup to final delivery tracking.
- Contribution recognized on the platform's official [contributors page](#).

Wish Delivery App — Android Delivery App with Live Tracking & Relay System

Jul 2025 – Aug 2025

- Built a Flutter Android delivery app prototype covering rider KYC onboarding, document verification, and approval workflow.
- Integrated Google Maps API and geolocation for live GPS tracking of riders during deliveries.
- Designed a zone-based delivery routing system with a relay handoff mechanism for cross-zone orders, reducing individual rider travel distance.
- Built a rider wallet system for cash-on-delivery collection, overflow limits, and settlement handling.

Product Research Intern

IIT BHU — under *Dr. Hari Prabhat*, CSE Department

Varanasi, India (Onsite)

Dec 2024 – Feb 2025

- Researched and proposed a model for a STEM wooden toy using optical color sensors to detect color-coded commands, enabling screen-free coding for children aged 5+.
- Proposed infrared sensor-based line-following navigation and a microcontroller-based command execution engine for movement, speed, and turns.
- Surveyed existing STEM products (e.g., Ozobot) and sensor technologies (optical, infrared, gyroscope, accelerometer); proposed a dual-pathway model combining beginner color-codes with advanced OzoBlockly block-based programming.

Summer Research Intern

IIIT Kottayam — under *Dr. Panchami V*

Kottayam, India (Hybrid)

May 2023 – Aug 2023

- Built an IoT-based smart irrigation system on Raspberry Pi with Python, interfacing soil moisture, temperature, and humidity sensors.
- Simulated the hardware architecture in Proteus PCB Design & Circuit Simulator, and transmitted live sensor data to ThingSpeak for real-time visualization.
- Implemented automated control logic to trigger water pumps based on live moisture readings, improving decision-making speed by 40% and crop yield by 50%.
- Code available on [GitHub](#).

PROJECTS

Clearo | *HTML, CSS, JavaScript, Responsive Design* — Live

Jun 2025 – Jul 2025

- Built the static website for a subscription-based RO water purifier rental service, including product pages, pricing plans, and conversion-focused CTAs.
- Delivered fully responsive layouts across desktop, tablet, and mobile.

DDoS Detection & Mitigation System | *Wireshark, Nagios, Apache, GoldenEye, ML*

B.Tech Capstone (supervised by Mr. Shubhendra Singh)

2023 – 2024

- Simulated IP-based DDoS attacks using GoldenEye against a local Apache Server target to test network resilience.
- Applied statistical analysis and machine-learning heuristics to baseline traffic and detect anomalous spikes or flow patterns, using Wireshark and Nagios for monitoring.
- Implemented traffic filtering, rate limiting, and traffic shaping to mitigate malicious requests while preserving service for legitimate users.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, C++, PHP, Python, SQL

Frontend: Next.js, React.js, Tailwind CSS, Three.js, Framer Motion

Backend: Node.js, Nest.js, Laravel, REST APIs, API Design, Authentication

Databases: PostgreSQL, MySQL, MongoDB

Mobile: Flutter

Real-time & Media: Amazon Chime SDK, LiveKit, Firebase Realtime Database, WebRTC

Smart TV: Samsung Tizen, Norigin Spatial Navigation

Integrations: Razorpay, Delhivery API, Google Maps API

Tools: Git, GitHub, Postman, Figma, Wireshark, Nagios, Proteus, ThingSpeak

Core CS: Data Structures, Algorithms, Operating Systems, Computer Networks, OOP

EDUCATION

UIET, Kanpur

B.Tech in Information Technology

Kanpur, India

2020 – 2024

Mahatma JF Public School

Higher Secondary (12th) — 74%

Varanasi, India

2019

Mahatma JF Public School

Secondary (10th) — 9.4 CGPA
